**Advanced Building Code**

Advanced Module of Continuing Education approved as an “Advanced Module by the Florida Building Commission and as Continuing Education Credits from the CILB. This course is an updated version, as of January, 2006. This course was purchased from the Building Code Commission as part of their mandate to provide advanced training to construction professionals.

**Course Description:** This 1 hour presentation is designed to help the practicing construction professional apply the New Florida Uniform Building Code, in day to day practice. It amplifies and clarifies the previous core requirements which was initially required of all construction professionals and continues to be required within 2 years of initial licensure of these same individuals.

**Course Objectives:** The objective of course is to assist the construction professional apply the administrative section of the Florida Uniform Building Code. These practices and standards include the inclusion of the Florida Building Code, Residential and the Florida Existing Building Codes.

**Classroom:** Presentation methods include lecture, overheads, PowerPoint, handouts, workshop exercises and selected readings. Specific methods are selected to maximize student participation and involvement with the course materials.

**Verification of Course Objectives:** The course instructor will use class discussion and question and answer periods to confirm that the course objectives have been obtained by students.

**Instructors:** Each instructor (already submitted) has met the requirements and been awarded an Educator Certificate from the Broward County Public Schools.
