Subject: RE: Residential Construction Cost Impact Workgroup Assignments

Mr. Campbell –

I reviewed and researched the code sections assign to me and did not find any that would impact the residential cost in those sections, in my opinion. As noted below, I will be out of town during the meetings and wanted to get this information to you.

Please note that I will be on vacation starting July 20th and will return on August 6th.

Here is the link to all the charts on the

BCIS: http://www.floridabuilding.org/fbc/thecode/2020_Code_Development/2020_Code_Development_Process.htm.

You should focus your attention on two of the charts. The first chart to focus on is the one labeled "Chart #1; Tracking Charts with TAC Action–Accommodate Florida Specific Need." This chart only contains those code changes the TACs' recommended for approval. The second chart to focus on is toward the bottom of the page. It is labeled "Tracking Charts with ICC Monograph." This chart will allow you to lookup the actual code change language. You can search the charts for a particular code change using Control-f. Additionally, each code change number listed in a chart contains a hyperlink to the actual code change language.

If you have any questions about your assignment or how to navigate the charts do not hesitate to contact myself or Mo Madani. My email is thomas.campbell@myfloridalicense.com and my phone number is 850-717-1823. Mo's email is mo.madani@myfloridalicense.com and his phone number is 850-717-1825.

Thanks,
