

Course Syllabus

Course Name:

Residential Roofing and Hurricanes 2 hours

Course Description:

This course is a case study, via photographic review, of the performance of various types of roofing during the 2004 Florida storms. An overview of hurricane wind dynamics and related information relative to the roofing chapter of the 2004 Florida Building Code, Residential (excluding HVHZ), is included.

Evaluation Method:

Students will be offered opportunity to provide oral and written questions and comments to facilitate course and instructional improvement
