

The Florida Building Commission
Electrical Technical Advisory Committee
May 13, 2002
Committee Report

The Committee met and considered the following items:

- (1) The TAC reviewed and provided comments with regard the guide / cross reference documents which identify sections of the Code with the provisions for electrical requirements.

Action: the Committee approved the guide and instructed staff to do the following:

- revise the guide to reference electrical provisions of the Florida Building Code / sub-codes (plumbing, mechanical and gas).
 - revise the guide to cross reference only the pertinent general sections of the code.
 - post the guide on the DCA/ Commission website as general information with the clarification that the list of sections is general and the users should make the effort to review these sections for determining applicable specific code requirements.
 - propose a code change as part of the glitch code change process necessary to add the guide to Chapter 27 of the Florida Building Code.
- (2) The Committee requests that all electrical issues be referred to the Electrical TAC for their review and input.
 - (3) The Committee requests that the proposed electrical provisions of the Rehab Code be referred to the Electrical TAC for their review and input.
 - (4) The Committee voted to recommend to the Commission the adoption of the 2002 NEC as part of the glitch code change process. However, the Committee would like the Commission to provide an answer to the following questions:

Can the Committee submit a code change to propose the adoption of the 2002 NEC?

If the answer is “yes”. Can the TAC direct staff to submit the code change on behalf of the Committee? and does the code change has to be justified using the code change justification criteria for impact analysis?

- (5) The TAC would like to meet at the next Commission meeting for up to 2 - hours.
