

Good afternoon Mo,

Upon reading the draft report and seeing the nearly identical similarity in the side by side comparison of the NAFS standard and TAS 202, why is only TAS singled out in the recommended course of action section 3.1?

The NAFS standard should be listed there also.

Additionally, on page 17 where TAS202 is described (last paragraph) line 5 seems to indicate that the water test is run for 30 seconds. Consider deleting "for 30 seconds" from that sentence.

Lastly, the first sentence on page 23 does not read properly in describing the MAT report recommendation FL-12a.

Contact me with any questions.

Thank you.

Jaime
