

THROUGH FRAME INSTALLATION

Max	Frame	DP	IMPACT
49 3/	/8 × 48	+50/-55	NO

Installation Notes:

TYPICAL ELEVATION WITH FASTENER SPACING

- Seal brickmould/frame to substrate.
- into the wood framing. For 2x wood frame substrate (min. S.G. = 0.42) Use #8 PH or greater fastener through the frame with sufficient length to penetrate a minimum of 1 1/2"
- project of installation. Host structure (wood buck, masonry, steel) to be designed and anchored to properly transfer all loads to the structure. The host structure is the responsibility of the architect or engineer of record for the

ယ

General Notes:

- Building Code (FBC) and the industry requirement for the stated conditions. of the adopted International Building Code (IBC), the International Residential Code (IRC), the Florida The product shown herein is designed tested and manufactured to comply with the wind load criteria
- All glazing shall conform to ASTM E1300

αω4

- At minimum, glazing shall be double strength annealed insulating glass
- Use structural or composite shims where required

Installation Notes:

TYPICAL ELEVATION WITH FASTENER SPACING

- Seal brickmould/frame to substrate.
- Use 2-#8 PFH or larger fasteners through masonry strap with sufficient length to penetrate a minimum
 of 1 1/2" into the masonry or buck.. For concrete (min. fc = 3000 psi) or masonry substrate (CMU shall
 adhere to ASTM C90).
- Use 2-#8 PFH or larger fasteners through masonry strap into jamb without penetrating through the jamb into product causing visability or collateral damage to product.
- Host structure (wood buck, masonry, steel) to be designed and anchored to properly transfer all loads to the structure. The host structure is the responsibility of the architect or engineer of record for the project of installation.

General Notes:

- The product shown herein is designed, tested and manufactured to comply with the wind load criteria of the adopted International Building Code (IBC), the International Residential Code (IRC), the Florida Building Code (FBC) and the industry requirement for the stated conditions.
- All glazing shall conform to ASTM E1300.
