

NAIL FIN INSTALLATION

# MPACT N 0

## Installation Notes:

TYPICAL ELEVATION WITH FASTENER SPACING

- Seal flange/frame to substrate.
- ယ Ņ Use #8 PH or greater fastener through the nailfin head and sides with sufficient length to penetrate a minimum of 1 1/2" into the wood framing. For 2x wood frame substrate (min. S.G. = 0.42)
- project of installation. to the structure. The host structure is the responsibility of the architect or engineer of record for the Host structure (wood buck, masonry, steel) to be designed and anchored to properly transfer all loads
- 4 Install screws in every pre-drilled hole. Use #8 x 2" PH or greater fasteners through channel guide, bracket and head jamb into wood framing.

#### General Notes:

- of the adopted International Building Code (IBC), the International Residential Code (IRC), the Florida Building Code (FBC) and the industry requirement for the stated conditions. The product shown herein is designed tested and manufactured to comply with the wind load criteria
- 0 Ω 4 All glazing shall conform to ASTM E1300.
  - At minimum, glazing shall be double strength annealed insulating glass.
- Use structural or composite shims where required.
