

NAIL FIN INSTALLATION

NO	+35/-40	48 x 84
IMPACT	DP RATING IMPACT	Max Frame

Installation Notes:

- Seal flange/frame to substrate.
- ယ 2 into the wood framing. For two (2X) wood frame substrate (min. S.G. = 0.42). Use #8 PH or greater fastener through the nail fin with sufficient length to penetrate a minimum of 1 1/2"
- project of installation. to the structure. The host structure is the responsibility of the architect or engineer of record for the Host structure (wood buck, masonry, steel) to be designed and anchored to properly transfer all loads

General Notes:

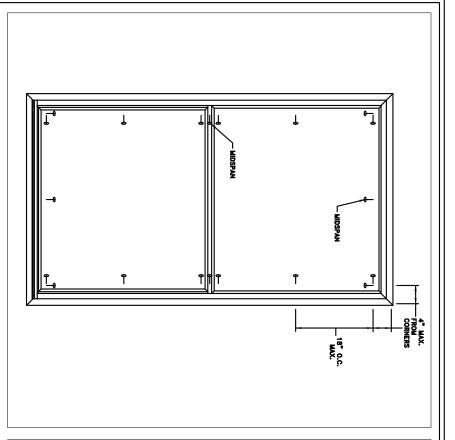

- of the adopted International Building Code (IBC), the International Residential Code (IRC), the Florida Building Code (FBC) excluding HVHZ and the industry requirement for the stated conditions. The product shown herein is designed, tested and manufactured to comply with the wind load criteria
- All glazing shall conform to ASTM E1300.
- At minimum, glazing shall be 3.0mm annealed 12.7mm airspace 3.0mm annealed insulating glass
- 0 2 4 Use structural or composite shims where required

conditions. For the complete installation procedure, see the instructions noted. It is not intended as a guide to the installation process and does packaged with the window or go to www.jeld-wen.com. not address he sealing consideration that may arise in different wall window to achieve the rated design pressure up to the size limitations This schedule addresses only the fasteners required to anchor the
