RE: ASTM E330 Test Method Equivalence

To Whom It May Concern,

The ASTM E330-02 test method was reapproved with no revisions in 2010 as ASTM E330-02(2010). ASTM E330-02(2010) was revised in 2014 to be a concurrent Metric and Imperial primary document with no other technical changes made and is the currently active ASTM E330/ E330M-14 test method.

Therefore compliant testing to the currently active ASTM E330/ E330M-14 test method is equivalent to compliant testing performed to ASTM E330-02(2010) test method requirements.

Please feel free to contact me if you have any questions or concerns. Have a happy day.

Kind regards,
National Certified Testing Laboratories
