**TO: Dan Stokes  
JELD-WEN, Inc.**

**SUBJECT: Equivalency of Editions of ASTM E1886**

This correspondence addresses the equivalency of the additions of the ASTM E1886 ASTM E1886 "Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials

WDMA has determined that in all instances related to windows and doors, the requirements of ASTM E1886-13 are either identical to, or improvements to the requirements of all ASTM E1886 editions between and including 2005 through 2013a, or are language revisions that do not adversely affect the performance of compliant products.

WDMA encourages users, specifiers and code authorities to accept compliance to ASTM E1886-13 as having satisfied any contract, specification or code requirement for compliance to ASTM E1886-05.

Sincerely,

John McFee
