#### SCOPE:

Molimo, LLC was contracted by Jeld-Wen Windows & Doors to evaluate alternate installation methods for their Finishield Steel ISW Glazed Wood Edge w/ Sidelites OXXO. The evaluation is based on physical testing and product certifications.

Reference standards utilized in this project include:

Florida Building Code. International Code Council.

ANSI/AWC *National Design Specification (NDS) for Wood Construction*. American Wood Council.

AISI S100 North American Specification for the Design of Cold-Formed Steel Structural Members. American Iron and Steel Institute.

ICC-ES Report ESR-1976 ITW Buildex TEKS Self-Drilling Fasteners. ICC Evaluation Service.

NOA 21-0201.06 *Tapcon Concrete and Masonry Anchors with Advanced Threadform Technology*. Miami-Dade County Product Control Section.

The anchorage analysis presented herein does not address the water resistance, water penetration, or air infiltration performance of the installation method or the installed product. In addition, the analyses rely on the assumption that the building substrate is capable of withstanding the incurred loads.

## Certification of Independence

In accordance with Rule 61G20-3 Florida Administrative Code, Molimo, LLC hereby certifies the following:

- Molimo, LLC does not have, nor does it intend to acquire or will it acquire, a financial interest in any company manufacturing or distributing products tested or labeled by the agency.
- Molimo LLC s is not owned, operated or controlled by any company manufacturing or distributing products it tests or labels.
- Michael D. Stremmel, P.E. does not have nor will acquire, a financial interest in any company manufacturing or distributing products for which the reports are being issued.
- Michael D. Stremmel, P.E does not have, nor will acquire, a financial interest in any other entity involved in the approval process of the product.

#### **ANALYSES**:

### **Summary of Test Results**

Table 1 summarizes the various Finishield Steel ISW Glazed Wood Edge w/ Sidelites OXXO products and their corresponding performance levels which have been established by testing or product certification.

Table 1: Summary of Test Results

| Series/Model   | <b>Test Report Number</b>                               | Size (W x H)       | Performance                   |
|--|---|--------------------|-------------------------------|
| Finishield Steel ISW Glazed Wood Edge w/ Sidelites OXXO (Through Frame Installation) | NCTL Report No.<br>NCTL-210-3804-1<br>(Rev. 0, 3/01/12) | 148-7/8" x 81-3/4" | +35 / -35 psf<br>(non-impact) |

Testing documented in Table 1 was conducted by National Certified Testing Laboratories of Orlando, Florida (Florida Department of Business & Professional Regulation Test Lab No. TST1589 – laboratory was approved at the time of testing). The testing documented above is certified by NAMI under certification number NIO11065-R5 and NIO11065.01-R6 (Expires 4/30/2028).

#### **As-Tested Installation Analysis**

For air/water/structural testing, the test specimen was secured to a Douglas-Fir wood test buck with #10 wood screws (3" long) at the head, sill, and jambs. The as tested installation method is evaluated on Pages 5 and 6. These capacities will be used to prove acceptable anchors and substrates for the product.

#### **Alternate Anchorages**

Calculations on Pages 7 through 13 determine the design capacity of alternate installation anchorages for the product.

#### **Anchorages Requirements**

As-tested spacing must be maintained. It must be determined that the anchorages are not overloaded for the approved product size and design pressures. Calculations presented on Page 14 show the alternate anchorages are acceptable for the established product performance.

Anchorage requirements established by this report are accurately presented in Drawing D1000349.

 $P_{allow} = 739 lb / 3.0 = 246 lb$ 

Bearing Capacity (of #8 screw on frame)

 $P_b = F_e D t / K_D = (3,350 psi)(0.164")(0.719")/(10(0.164) + 0.5) = 184 lb$ 

Bearing Capacity (of #8 screw on strap anchor)

 $P_b = 2.7 D t F_{tu} = 2.7(0.164")(0.033")(45,000 psi) = 657 lb$ 

 $P_{allow} = 657 lb / 3.0 = 219 lb$ 

**Design Capacity of the Connection = 184 lb (one screw)** 

Design Capacity of the Connection = 368 lb (two screws)

Date:

27206.05-107-16 Finishield Steel ISW Glazed

Wood Edge w/ Sidelites OXXO 9/22/2023

Page 14 of 14

### **Anchorage Requirements**

Series/Model: Finishield Steel ISW Glazed Wood Edge w/ Sidelites OXXO

Test Unit Size: 184-7/8" x 81-3/4"

Design Pressure: +35.0 / -35.0 psf

### **Through-Frame Installation Method**

Through frame installation method is validated by the test

Through Frame Anchor Capacity = 143 lb / anchor

### **Alternate Installation Methods**

Strap Anchor to Wood = 250 lb / anchor strap (Two wood screws per strap)

Through-Frame to Concrete = 181 lb / anchor

Through-Frame to CMU Block = 135 lb / anchor

Strap Anchor to Concrete = 181 lb / anchor

Strap Anchor to CMU Block = 135 lb / anchor

Strap Anchor to Wood (Cap Installation) = 184 lb / anchor

Minimum Alternate Installation Capacity = 135 lb / anchor

135 lb < 143 lb

- Approximately 5.5% difference, alternate anchorage is deemed equivalent (< 10%)

#### Alternate Anchorages OK at tested spacing
